

Oregon Essential Drug List

The Essential Drug List (formulary) includes a list of drugs covered by Health Net Health Plan of Oregon (Health Net). The drug list is updated often and is subject to change. All previous versions are no longer in effect. You can view the most current drug list by going to our website at www.healthnetoregon.com or call us at the toll-free telephone number on your Health Net ID card to request a copy. Refer to Evidence of Coverage for specific cost share information.

January 01, 2025

Health Net of Oregon, Inc. is a subsidiary of Health Net, LLC, and Centene Corporation. Health Net is a registered service mark of Health Net, LLC. All rights reserved.

Welcome to Health Net

What if i have question regarding my pharmacy benefit?

If you have questions about your pharmacy coverage, contact Customer Service at the phone number listed on your Health Net ID card. Customer Service can help you with questions about your prescription drug benefits, including, but not limited to:

- Information about drugs covered under the medical benefit.
- The process for submitting an exception request, requesting prior authorization and step therapy exceptions.
- Actual dollar amounts of cost sharing for drugs subject to coinsurance.

What is the Drug List?

The Drug List is a complete list of covered drugs used to treat common diseases or health problems. The drug list is selected by a committee of doctors and pharmacists who meet regularly to decide which drugs should be included. The committee reviews new drugs and current information about existing drugs and chooses drugs based on:

- Safety
- Effectiveness
- Side effects
- Value (If two drugs are equally effective, the less costly drug will be preferred)

How do I find a drug in the Drug List?

You can search for a drug by using the search tool, alphabetical index or by categorical list. There are three ways to find out if your drug is covered.

- *Search Tool:* Open the List of Drugs (PDF). Hold down the “Control” (Ctrl) and “F” keys. When the search box appears, type the name of your drug. Press the “Enter” key.
- *Alphabetical Index:* The index at the end of the PDF lists the names of generic and brand name drugs from A to Z. Once you find a drug name, go to the page number listed to see if the drug is covered.
- *Categorical list:* The drugs are grouped into therapeutic categories. If you know what therapeutic category your drug is in look through the list to find the category. Then look under the category and class for your drug.

If a generic equivalent for a brand name drug is not available in the market or not covered, the generic drug will not be listed separately. The presence of a drug on the drug list does not guarantee that your doctor will prescribe the drug for a particular medical condition.

What if my drug is not on the Drug List?

If your drug is not on the drug list, call us at the telephone number on your Health Net ID card and ask if your drug is covered. If your drug is not covered, you can ask your doctor to prescribe a similar drug that is covered. Your doctor can ask us to make an exception if he or she feels you need the drug that is not covered. If we approve an exception request for a drug not on the drug list, the non-preferred brand tier (Tier 3) copayment will apply.

How much will I pay for my drugs?

To figure out how much you will pay for a drug, the abbreviations in the table below appear in the Drug Tier column on the formulary. The copayment or coinsurance levels are defined in the table below. If you do not know your copayment or coinsurance for each tier, please refer to your Summary of Benefits or other plan documents.

Tier	Copayment/Coinsurance	Description
1	Tier 1 copayment or coinsurance	Tier 1 consists of most generic drugs and low-cost preferred brand name drugs.
2	Tier 2 copayment or coinsurance	Tier 2 consists of nonpreferred generic drugs, preferred brand name drugs, and other drugs based on safety, efficacy, and cost.
3	Tier 3 copayment or coinsurance	Tier 3 consists of nonpreferred brand name drugs and drugs that generally have a preferred and often less costly therapeutic alternative at a lower tier.
AC	Anticancer drug and miscellaneous supplies copayment or coinsurance	AC tier consists of oral anticancer drugs and miscellaneous supplies. You may be required to get these drugs from a Specialty pharmacy.
GP	Generic Preferred	A Brand name is listed for reference only when a generic equivalent is available. Depending on your plan, these drugs are either not covered (non-formulary), covered at Tier 3, or covered at a copayment plus the difference in cost between the brand and generic drug. Refer to your plan
PV	Preventive Benefit	PV tier consists of preventive benefit drugs, including contraceptives. If your plan has a preventive benefit these drugs are covered at no cost.
SP	Specialty copayment or coinsurance	SP tier consists of drugs that are distributed through a specialty pharmacy, drugs that require special training or monitoring for self-administration, and drugs that are classified as high-cost agents.

What are generic drugs?

A generic drug contains the same active ingredient and works the same way as the brand name drug. Generic drugs are safe and effective, and generally cost less.

Generic drugs are available on the drug list at Tier 1. Brand name drugs with a generic equivalent are either non-formulary or non-preferred, depending on your plan benefits. If your doctor determines that you need a brand name drug instead of its generic equivalent, your doctor can submit a prior authorization request for a formulary exception with documentation of medical necessity.

Are there any limits on my drug coverage?

Some drugs have limits on coverage. The table below provides a description of abbreviations that may appear in the Limits column on the drug list:

Abbreviation	Definition	Description
AL	Age Limit	These drugs may require prior authorization if your age does not fall within manufacturer, FDA or clinical recommendations.
PA	Prior Authorization	These drugs require prior authorization. This means that you or your prescriber must get approval from us before you fill your prescription. If you do not get approval, we may not cover the drug.
PV	Preventive Benefit	Drugs classified under the Affordable Care Act (ACA) as preventive health drugs, including prescription and OTC contraceptive drugs and devices. Preventive health drugs are determined based on evidence-based recommendations by the United States Preventive Services Task Force (USPSTF).
QL	Quantity Limit	These drugs have a limit on the amount that will be covered. Your doctor must request approval from Health Net for a higher quantity of the drug.
RX/OTC	Prescription & Over the Counter (OTC)	Certain drugs are available both in a prescription form and in an OTC form. Only prescription drugs are covered by your plan with the exception of some insulins, insulin supplies and some covered preventive drugs.
ST	Step Therapy	Step therapy is when you are required to use one drug before another, in a stepwise fashion. Unless an exception is made, one or more preferred drugs must be tried first before progressing to a drug that is subject to step

How can I get an exception to the rules for drug coverage?

Your doctor can ask for an exception to our rules for drug coverage.

- Your doctor can ask us to cover your drug even if it is not on the drug list.
- Your doctor can ask us to make an exception for limits on your drug. For example, if your drug has a quantity limit of 1 tablet per day, your doctor can ask us to cover more.

To request an exception, your doctor can fax a prior authorization form along with a written statement supporting the request to us at 1-800-255-9198.

Are injectable drugs covered?

Injectable drugs are not covered, except for those listed on the drug list. Some injectable drugs are considered “specialty drugs” and, in most cases, must be obtained from one of Health Net’s approved Specialty Pharmacies.

Are compounded prescriptions covered?

Compounded prescriptions require prior authorization for coverage. If prior authorization is granted, your Tier 3 copayment or coinsurance applies.

Can I go to any pharmacy?

To get the best benefit, you should use pharmacies that are in the network. These pharmacies have a contract with Health Net. Most chain pharmacies and many independent pharmacies are in the network. To find a pharmacy near you, visit our website at www.healthnetoregon.com or call us at the telephone number on your Health Net ID card.

If you fill your prescription at an out-of-network pharmacy, the pharmacy may not be able to bill Health Net online, so you may have to pay the full cost of your drug. If you do pay out-of-pocket for your drug, you may be able to send us your pharmacy receipt and ask for reimbursement of our share of the cost. Please refer to your plan documents for more information.

Some injectable and high cost drugs (including anticancer drugs) may be considered “specialty drugs”. These drugs must be obtained from one of Health Net’s approved Specialty pharmacies.

Can I use a mail order pharmacy?

You can use the CVS Caremark Mail Order Pharmacy for the home delivery of most maintenance drugs. Maintenance drugs are those needed for a long term condition.

To use the mail order pharmacy, your doctor must provide new prescriptions that allow up to a 90-day supply of each drug. Mail order forms are available on our website at www.healthnetoregon.com or you may call us at the telephone number on your Health Net ID card to request a form.

How often can I refill my prescription?

- For prescriptions written for 10-days or less, you may refill after 50 percent of the supply has been used as directed.
- For prescriptions written for more than 10-days, you may refill after 74 percent of the supply has been used as directed.

If your physician has increased your dose, your pharmacy must be notified of the change. If this change will result in an early refill request, your pharmacy can contact Health Net for an override.

How can I save money on my prescription drugs?

You can save time and money with these simple steps:

- Ask your doctor about generic drugs that may work for you.
- Fill prescriptions at Health Net participating pharmacies.
- Be sure your doctor prescribes drugs on the drug list
- Fill your maintenance drugs through our mail order pharmacy program.

Definitions

Brand drug: Is a drug that is marketed under a proprietary, trademark-protected name. A brand drug is listed in this formulary in all CAPITAL letters.

Coinsurance: Is a percentage of the cost of a covered health care benefit that you pay after you have paid the deductible, if a deductible applies to the health care benefit.

Copayment: Is a fixed dollar amount that you pay for a covered health care benefit after you have paid the deductible if a deductible applies to the health care benefit.

Deductible: Is the amount you pay for covered health care benefits that are subject to the deductible before your health insurer begins to pay. If the plan has a deductible, it may have either one deductible or separate deductibles for medical benefits and prescription drug benefits. After you pay your deductible, you usually pay only a copayment or coinsurance for covered health care benefits. The plan pays the rest.

Drug Tier: Is a group of prescription drugs that correspond to a specified cost sharing tier. The drug tier in which a prescription drug is placed determines your portion of the cost for the drug.

Exception request: Is a request for coverage of a non-formulary drug. If you, your designee, or your provider submits a request for coverage of a non-formulary drug, the plan must cover the non-formulary drug when it is medically necessary for you to take the drug.

Formulary or prescription drug list: Is the list of drugs that is covered by the plan under the prescription drug benefit of the policy.

Generic drug: Is a drug that is the same as its brand name drug equivalent in dosage, strength, effect, how it is taken, quality, safety, and intended use. A generic drug is listed in the drug list in bold and italicized lowercase letters.

Medically Necessary: Is a health care benefit needed to diagnose, treat, or prevent a medical condition or its symptoms and that meet accepted standards of medicine. Plans usually do not cover health care benefits that are not medically necessary.

Non-formulary drug: Is a prescription drug that is not listed on the drug list.

Out-of-pocket costs: Are your expenses for health care benefits that are not reimbursed by the plan. Out-of-pocket costs include deductibles, copayments, and coinsurance for covered health care benefits, plus all costs for health care benefits that are paid by the Member and not covered by the plan.

Prescription: Is an oral, written, or electronic order from a prescribing provider authorizing a prescription drug to be provided to a specific individual.

Prescription drug: Is a drug that by law requires a prescription.

Prior Authorization: Is a decision by the plan that a health care benefit is medically necessary for you. If a prescription drug is subject to prior authorization in the drug list, your doctor must request approval from the plan to cover the drug before you fill your prescription. The plan must grant a prior authorization request when it is medically necessary for you to take the drug.

Step therapy: Is a specific sequence in which prescription drugs for a particular medical condition must be tried. If a drug is subject to step therapy in the drug list, you may have to try one or more other drugs before the plan will cover that drug for your medical condition. If your doctor submits a request for an exception to the step therapy requirement, the plan must grant the request when it is medically necessary for you to take the drug.

Nondiscrimination Notice

Health Net Health Plan of Oregon, Inc., “Health Net” complies with applicable federal civil rights laws and does not discriminate, exclude people or treat them differently on the basis of race, color, national origin, ancestry, religion, marital status, gender, gender identity, sexual orientation, age, disability, or sex.

HEALTH NET:

- Provides free aids and services to people with disabilities to communicate effectively with us, such as qualified sign language **interpreters and written information in other formats (large print, accessible electronic formats, other formats).**
- Provides free language services to people whose primary language is not English, such as qualified interpreters and **information written in other languages.**
